

CORPORATE LABORATORIES

specialized penetration test labs for training

Corporate laboratories by Pentestit represent virtual labs, based on real companies' networks and containing a variety of vulnerabilities and misconfigurations. Corporate labs are specialized platforms for testing and improving penetration testing skills. Labs are available 24/7 and implemented with the best practices of information security. Depending on the tariff plan different number of vulnerable servers are provided for pen testing. Additionally, you can use instructor help, who will provide detailed advice for completing practical tasks in case of any difficulties.
